

BROKEN OAK RANCH

SUPPLYING QUALITY GENETICS FOR THE SELECTIVE CATTLEMAN
CHECK OUR HERD SIRE BATTERY FOR YOUR SEMEN NEEDS

BLACK JOKER is our #1 herd sire. Tested homozygous polled and albinism free, this Thunder X Phenomenon son has done it all at BOR. We've used him successfully on first-calf heifers with no problems. His calves' average birth weights have been 79 pounds. Our semen customers have raved about this bull's calves and their success with his semen and progeny. Here you have PERFORMANCE packed in a black package that passes these valuable traits on to his offspring. His calves are strong, thickly made and show great performance in the pasture as well as the feedyard.

CALL FOR BLACK JOKER SEMEN OR COME SEE HIS PROGENY!

POLLED VISION has proven himself in our herd, as well as our customers' herds. We recommend him for use on mature cows. His calves are vigorous at birth, and they get up and nurse immediately. Polled Vision calves will grow with the best of them and have outstanding weaning and yearling weights. His calves have "butts and guts," as most of our customers describe them. They are some of the first selected from our replacement heifers and range bulls. Here is a proven polled herd sire that produces calves that are structurally correct with performance.

CALL FOR POLLED VISION SEMEN OR COME SEE HIS PROGENY!

BOR BLACK TOM is a 3/4 homozygous polled bull we've had for a year. We've held off saying very much about this bull until we had the chance to evaluate his progeny. Well, the proof is in. His calves have surpassed our wildest expectations. They are lean, long bodied and vigorous at birth. With only grass, his calves' average weaning weight topped our program. His progeny have ideal bone structure and size and are the first picks for our customers looking at show prospects. His replacement females and sire prospects are admired by all. We are selling two breeding shares in this bull.

CALL FOR DETAILS AND BECOME A PART OF THIS OPPORTUNITY.

WESTERN UNION was our choice at last year's National Sale. He will be used to add some new genetics and to expand the BOR program. Eric only wanted one thing at last year's sale and that was Western Union. The bull arrived at the ranch the day after the sale, had his nose ring removed, and was put to pasture. Results are now on the ground and we are very pleased! His calves' average birth weight from the few that we have is 77 lbs. They are correct, have some frame and are long bodied. Here is a polled bull with great EPDs giving you an opportunity to start with a bull that has a bright future. Recommended for mature cows.

SEMEN IS AVAILABLE, PLEASE CALL US FOR DETAILS.

Introducing our newest herd sire prospect, **TML SILVERADO 108S!** We appreciate Two Moons & Flying I giving BOR a part ownership in this outstanding young prospect. We have been searching for a bull with some thickness and capacity that would work in the BOR herd. Genetically and phenotypically, this prospect presented an opportunity we couldn't pass up. The outstanding cow family Nutterbutter & Lollipop in this bull's pedigree just adds to his value. We've always felt these were two of the BEST Braunvieh females in the country. Roger & Miss Mary have some more show plans for this bull, but he will be at BOR soon after the show season. Contact BOR or our partners for more information about this bull. Soon he will be at BOR working in the pasture and our AI and flushing programs!
